

ISURU PINTHU

Cyber Security Undergraduate | DevOps Enthusiast

45 Moragolla, Puwakpitiya | isuruudanapinthu@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Motivated and detail-oriented Cyber Security undergraduate at SLIIT (Sri Lanka Institute of Information Technology), currently in the second year of a BSc (Hons) in Information Technology with a specialization in Cybersecurity. Passionate about DevOps practices, secure system design, and network defense. Experienced in building automation pipelines, conducting vulnerability assessments, and applying security principles across Linux-based environments. A proactive learner and IEEE student member with a strong drive to contribute to impactful, security-first engineering projects.

PROJECTS

Automated External Asset Discovery Tool | Personal Project | 2026 Feb

- Engineered an automated reconnaissance script to continuously map an organization's external attack surface by identifying active subdomains, exposed IP addresses, and open ports.
- Streamlined the data collection process to output parsed, readable reports, accelerating the preliminary phases of vulnerability assessments.
- Python, Bash, Nmap, OSINT Tools** Tech Stack:

Real-Time Intrusion Detection & Log Analysis | Personal Project | 2026 Jan

- Deployed a centralized log management pipeline to ingest, parse, and analyze system and network logs for real-time threat detection.
- Created custom alert rules and visual dashboards to identify anomalous patterns and notify administrators of potential security breaches instantly.
- ELK Stack (Elasticsearch, Logstash, Kibana), Linux, Python** Tech Stack:

CI/CD Pipeline Automation | Personal Project | 2025 Dec

- Designed and deployed an end-to-end CI/CD pipeline using GitHub Actions and Docker to automate application build, testing, and deployment.
- Achieved zero-touch deployments to a Linux server, eliminating manual steps and reducing deployment time significantly.
- Docker, GitHub Actions, Bash, Linux, YAML** Tech Stack:

EDUCATION

BSc (Hons) Information Technology | 2024 – Present

Sri Lanka Institute of Information Technology (SLIIT) | Specialization: Cybersecurity

- Currently in 2nd Year, 2nd Semester.
- Relevant Modules: Network Security, Operating Systems, Database Management, Software Engineering, Web Application Development, Data Structures & Algorithms.

CERTIFICATIONS

KodeKloud - Kubernetes and Cloud-Native Associate (KCNA): [Link](#)

KodeKloud - AWS Cloud Practitioner (CLF-C02): [Link](#)

KodeKloud - Shell Scripts for Beginners : [Link](#)

University Of Moratuwa – Python for Beginners : [Link](#) , verification code = foEP1MQxIB

TECHNICAL SKILLS

▪ Python	▪ Bash / Shell Scripting	▪ PHP
▪ Linux (Ubuntu/Kali)	▪ Docker	▪ Git & GitHub
▪ Nmap	▪ Wireshark	▪ Metasploit (Basics)
▪ GitHub Actions	▪ CI/CD Pipelines	▪ OWASP Top 10
▪ MySQL	▪ HTML / CSS	▪ Cloud Fundamentals
▪ Network Protocols	▪ Vulnerability Assessment	▪ Secure Coding Practices

CLUB ACTIVITIES & EXTRACURRICULARS

Student Member | IEEE — Institute of Electrical and Electronics Engineers

2025 – Present

- Active student member of the IEEE SLIIT Student Branch, participating in technical workshops, seminars, and networking events.
- Engaged in IEEE-organized cybersecurity and emerging technology sessions to broaden knowledge beyond academic curriculum.
- Collaborated with peers on IEEE initiative discussions related to AI, IoT security, and DevOps automation trends.
